

Our Events at COP31

From 9 to 20 November 2026, World Vision will be at COP31 in Antalya, Türkiye, standing alongside partners, advocates and young people to help shape climate solutions that work for children and the communities most affected by the climate crisis.

At the heart of our engagement is a simple belief: children must not only be protected from the impacts of climate change, they must also be part of the conversation about the future they will inherit. Through evidence, partnerships, and the voices and lived experiences of children and young people from around the world, we will spotlight the urgent need for climate action that is just, inclusive and responsive to their needs.

Discover where World Vision will be contributing to the conversation throughout COP31 and helping elevate children's voices on the issues that matter most to their future.
